

University of Cardiff

About the [School of Geography and Planning](#)

Our undergraduate courses focus on the impacts of economic, social, political and cultural change on the built and natural environment.

These courses are designed and delivered by a team of world-leading academics in the areas of geography and planning. While geography provides the skills to understand the nature of change and its impacts, planning translates this understanding into action to ensure a better quality of environment for present and future generations.

We provide our students with an immersive undergraduate experience aimed at developing not only an intimate knowledge of relevant subjects, but also the ability to contribute to a wide range of policy domains including social justice, health, urban futures, housing and homelessness, food justice, third world development, and economic regeneration.

Our excellent staff-student ratios ensure that you will have the opportunity to have close and regular contact with our members of staff who are dedicated to sharing their wealth of knowledge and experience with you.

Course equivalents

Courses from UF Geography Department		Courses from University of Cardiff	
GEO4938	Special Topics	CP0364	Geography and Planning
GEA1000	Geography for a Changing World	EA1201	Planet Earth
GEO2200 + GEO2200L	Physical Geography + Physical Geography Lab	EA1202	Earth Surface Processes
GEO3930	Introduction to natural hazards	EA1203	Dangerous Earth
GEO2242	Extreme Weather	EA1203	Dangerous Earth
GIS3043	Foundations of Geographic Information Systems	EA1204	Geographical Information systems
GEO4300	Environmental Biogeography	EA1213	Biological Environments
GEO3162C	Introduction to Quantitative Analysis for Geographers	EA1214	Geographical Data Analysis
GEO3372	Conservation of Resources	EA1215	Science and policy for geographers
GEO3352	Human footprint on the landscape	EA1216	Fundamentals of Environmental geography
GEO 4167C	Intermediate Quantitative Analysis for Geographers	EA2101	Data Acquisition and Analysis
GEO3352	The Human Footprint on Landscape	EA2113	Geocology
GEO4938	Special Topics	EA2116	Environmental Pollution

GIS3000+	Any 3000 level GIS course or above	EA2130	Applied GIS
GEO 3280	Principles of Geographic Hydrology	EA2141	Hydrology and Geomorphology of Catchments
GEO4938	Special Topics	EA2217	Marine Ecosystems
GLY4734	Coastal Morphology and Processes	EA2218	Coastal Processes and Geomorphology

Other courses can be reviewed case by case by the undergraduate coordinator.

Model Semester Plan for Exchange Students at Year 3:

Semester 5		Points
EA1215 Science and policy for geographers		10
EA1214 Geographical Data Analysis		10
Any course equivalent to a UF GEO/GIS3000 level course or above		10
Any course equivalent to a UF 3000 level course or above, but not in Geography		10
	Total	40

Semester 6		Credits
Any course equivalent to a UF GEO/GIS3000 level course or above		10
EA1204 Geographical Information systems		10
Any course equivalent to a UF 3000 level course or above, but not in Geography		10
Any course equivalent to a UF 3000 level course or above, but not in Geography		10
Any course equivalent to a UF GE-H course		10
	Total	50
